

PORTFOLIO WEBSITE UPDATE REPORT

Detailed Quality Audit & Clinical-Scientist Resume Synchronization

Client: Dr. D.M. Arifur Rahman, MD
Status: COMPLETED & BUILT SUCCESSFULLY

1. Executive Summary

This report summarizes the comprehensive updates made to the portfolio website of Dr. D.M. Arifur Rahman. Following his recent landmark professional achievements, his curriculum vitae (CV) was updated to V2. The changes elevate his profile from a practicing clinician to a globally recognized pioneer clinician-scientist. The primary focus of this update is to highlight his laboratory's landmark achievement—achieving ISO 15189:2022 Accreditation for the TMSS Biomolecular Lab (March 2026)—and to synchronize case load statistics, international certifications, ongoing research projects, and references across all website sections.

2. Core Statistics Synchronization

Surgical Pathology, Cytopathology, and IHC Cases

Before: 31,000 / 51,000 cases After: Over 60,000 cases

Next-Generation Sequencing (NGS) Cases Authorized

Before: Not Mentioned After: Over 1,000 cases

Peer-Reviewed Research Publications

Before: 32 Publications After: 44 Publications (37 Pub, 7 Sub)

3. Landmark Achievement Highlight

ISO 15189:2022 Accreditation (Achieved March 2026)

Dr. Rahman has achieved a historic milestone as Laboratory Director: securing ISO 15189:2022 accreditation for the TMSS Biomolecular Lab through the Emirates International Accreditation Centre (EIAC) under the ILAC Mutual Recognition Arrangement. This positions the facility as the First and Only accredited Next-Generation Sequencing (NGS) cancer diagnostics laboratory in South Asia. This milestone is highlighted prominently on the Home banner and the Resume pages, replacing the old "journeying towards accreditation" text.

4. Before vs. After Value & Benefit Matrix

This table explains the strategic value of updating specific fields for the client's patients, peers, and collaborators.

Feature & Scope	Previous Version	Updated Version	Clinical & Professional Benefit
ISO 15189 Accreditation	Listed as in-progress or "journeying towards" accreditation.	Achieved in March 2026. EIAC/ILAC certified scope for NGS cancer molecular diagnostics.	Establishes absolute trust. Oncologists can confidently rely on regional NGS results for critical target-therapy selections.
Clinical Diagnostic Volume	Approximately 31,000 / 51,000 cases signed out; no NGS cases.	Signed out >60,000 Histopath/IHC cases and >1,000 NGS-based cancer reports.	Showcases immense experience, making him the leading pathology expert in Bangladesh for precision oncology diagnostics.
Research Output & Publications	32 publications listed in the portfolio database.	44 peer-reviewed publications (37 published, 7 submitted) in publications.json.	Enhances academic weight, validating him as a prominent clinician-scientist engaged in active translational research.
Ongoing Genomic Projects	No structured listing of research on the resume page.	Added a scrollable section featuring 19 ongoing molecular cancer studies.	Demonstrates active clinical trial involvement, positioning the lab as a key regional hub for genomic oncology datasets.
Certifications & Credentials	Mentions basic local trainings and old Australia course.	Added NGeneBio Korea (2025), China NGS (2026), Johns Hopkins, & USA AMP.	Attests to continuous global training, alignment with AMP/CAP guidelines, and international qualifications.

5. Component-Level Technical Changes

[MODIFY] `src/data/publications.json`

Successfully appended 12 new peer-reviewed publications (IDs 33 to 44) extracted from the updated CV. Preserved existing structure (fields, authorships, years, abstracts, and download availability).

[MODIFY] `src/Header/Banner.jsx`

Updated primary marketing stats on the home banner to "60,000 cases" and set the milestone checkmark to "Achieved ISO 15189:2022 Accreditation for TMSS Biomolecular Lab (March 2026)".

[MODIFY] `src/Pages/About.jsx`

Updated the professional narrative: cases count updated to 60,000, publications updated to 44, added "Annual Performance Award (2025)" in the awards section, and updated the ISO accreditation passage.

[MODIFY] `src/Pages/Publications.jsx`

Updated the header intro text to announce "44 publications so far (37 published and 7 submitted)", ensuring statistical consistency across all navigation nodes.

[MODIFY] `src/Pages/Resume.jsx`

Conducted a complete high-standard refactoring: added BMDC registration (A57949), created a prominent Landmark Achievement section, created a key metrics cards grid, updated professional timelines, added a scrollable container for the 19 ongoing research projects, and designed side-by-side reference contact cards.

6. Build & Verification Status

STATUS: SUCCESSFUL PRODUCTION BUILD (Vite Compile Passed)

Executed "npm run build" successfully. All 1,794 modules transformed and minified into optimized production bundle chunks without compile-time errors.

7. Client Next Steps & Hosting Instructions

1. Review the newly refactored CV/Resume page on your local or staging server to evaluate the visual hierarchy and readability of the 19 research projects.
2. Review the Home Banner and About bio sections to ensure all descriptions read naturally and professionally.
3. Since the production build has passed successfully, the contents of the "dist/" folder are ready for deployment.
4. Provide the hosting server credentials (Netlify, Vercel, or Firebase) to upload the updated build along with the headless CMS configuration details.
